

## MICRO-ANCHOR PLATE

When weight and size are an issue, such as in mountain rescue and special operations packs, river rescue gear bags, or rope access work, the ultra-compact, light, anodized aluminum Micro-Anchor Plate is the right choice. The large hole acts as a collection point for multi-point anchors. The small holes keep carabiners separated, making them easier to work with when the system is loaded, and the oblong shape makes inserting carabiners easier and quicker. Hole diameters: small - 5/8 in (16 mm), large - 1 in (25 mm).
