

HELITACK HARNESS™

Designed for aircrews by aircrews, the full-body Helitack Harness brings operator comfort, safety and versatility to a new level. The sewn waist loop attachment point allows for multiple carabiner attachment as well as large hoist hooks without the risk of twisting or binding hardware. A rear D-ring provides a travel restraint attachment point when working inside the aircraft cabin. Sternal and dorsal attachment points provide additional hoisting/lifting points in order to facilitate specific mission requirements. The vest is made of high-visibility orange mesh and features reflective material on the back of each shoulder, allowing the wearer to be seen more easily in low light conditions, as well as aiding vertical referencing when suspended beneath the aircraft. Sewn web loops on the shoulders permit the attachment of a strobe light, knife or other accessories. Features Dual-Radio pockets for two hand-held radios or to store gloves, chemical light sticks or other adjuncts. The front features a built-in MOLLE Attachment System. Two 10-mm Delta Quick Links included.

Features:

- Integrated breathable mesh vest
- Removable pockets for HEED bottle, radio, and other items
- Sewn waist loop attachment point
- Sewn web loops at shoulders for accessory attachment
- Sternal and dorsal attachment points allow flexible hoisting
