

HELITACK AIRBAG™

CERTIFIED!

The Helitack AirBag provides patient transport for helicopter short-hauls and hoists where a litter is required. Classified to NFPA standards, it can be used with or without a backboard, and offers primary and secondary closure systems, features for efficient patient packaging and transport, and durable yet compact materials. The AirBag is simple to use, quick to deploy, and easy to stow, earning its place on the most demanding helicopter rescue operations.

- Compatible with most backboards, rigid litters, and vacuum splints
- Integrated machined aluminum Cobra Buckles® are secure, easy to adjust, and expedite loading/unloading process
- Bi-lateral patient access ports offer quick patient access during operation
- Adjustable hood helps protect patient's face
- 2 steel D-ring attachment points
- 2 internal straps with Cobra Buckles® for securing top of backboard or litter
- 3 color-coded internal patient packaging straps with quick-connect buckles
- 10 hi-viz support handles aid in carrying, positioning and loading the subject
- Full-length safety-glow accents reflect and glow for enhanced night visibility
- 8 bridle straps offer adjustable lengths for ideal configuration to aircraft
- 2 side stowage pockets for bridle when carrying on trails
- Internal/external fabrics clean easily
- Compact design uses minimal storage space: 21" L x 11" D
- Quick-detachable storage bag included
- UL Classified to NFPA Standards – Litter
- Breaking Strength
 - Horizontal: 22 kN (4,946 lbf)
 - Vertical: 11 kN (2,473 lbf)
- Made in USA

PRODUCT NAME	AIRBAG, HELITACK, CMC
PRODUCT WEIGHT	6.5 KG (14.5 LB)
DIMENSIONS	21 X 11 IN (STORED IN BAG), 92 X 30 IN (OPENED FLAT)
COLOR	RED/ GRAY/ BLACK
NFPA RATING	LITTER
