

SHELBY

#1 Glove In Fire®

Masters in First Responder Hand Protection

FIRST RESPONDER DRIVEN

Shelby Specialty Gloves most popular lineup of firefighter gloves – The SHELBY series, featuring GORE™ RT7100 Glove Barrier Fabric.

The innovation of the industry's first ever cut and sewn e-PTFE fire glove barrier system, along with its waterproof, breathable performance, provides an excellent integration of technology and manufacturing expertise. The GORE™ RT7100 Glove Barrier Fabric is uniquely suited to complement the highly engineered Shelby cut and sewn glove system, and is perfectly crafted to fit Shelby's NEW anatomically correct outer shell glove patterns.

The SHELBY series of gloves are subjected to a 100% dunk test that is performed on every liner system ensuring the greatest level of performance. Shelby Glove produces the finest fit, with proven durability, to ensure unbeatable performance and protection for those who serve.

Shelby's unique "Black Line" wristlet serves as a visual indication of heat exposure.

The Shelby breathable barrier thermal liner glove system is individually graded and produced in as many sizes as glove sizes. These barrier/thermal liner glove systems are sized proportional to human hand sizes. Patent 7,784,113,B2

SHELBY gloves meet or exceed current NFPA 1971 requirements.

Most Durable

5226
